Join us for our interactive Essential Brain Injury training designed for workers who are still relatively new to working in the field of brain injury and have not had any previous brain injury training.

This course provides

An introduction to the brain
and brain injury

An awareness of common
effects of brain injury

An introduction to the
functional impact of brain
injury in day to day life

Principles to help clients with
day to day challenges

Our brain injury course feedback

100% of our learners said they would recommend their training to friends and colleagues
100% of our learners agreed that they would be able to use the learning from the course in their work with their clients

“Excellent. Easy going and factual,
adapted to ensure everyone
understands.”

“I have gained an understanding of the
types of brain injury and the challenges it
can have on a client”.
